

Balance And Stabilise Your Healing Process

This 4-month healing experience begins next month, on the 1st.

Outline:

Based on the intentions you set in your Intake form, I will plan each step of your process as guided by a team of Spirit Guides who are specialists for your specific health challenges and your personal growth.

We will balance and stabilise your healing process until you can fully embody your new you and live a fulfilled life.

You will be able to:

- ★ balance and stabilise your healing process
- ★ understand the exact make-up of your soul, your dominant energy centers and your unique way of expressing yourself in the world
- ★ embody and ground your soul's gifts, talents and purpose

Here's what's included:

- ★ 4x2 Healing Sessions per month
- ★ life-long free access to my Archive page. This page provides you with my tools that support your healing processes - e.g. Free Online Classes, Healing Meditations, healing practices.
- ★ a free Check-In Session after your last Session to see what has changed for you so far and to plan the next steps.

How to go from here:

The total cost of this healing experience is €1000. You will pay in four instalments of €250. You will not be charged automatically. Sessions expire on the last day of each month. You can pause or stop after each month, since my booking set up is kind of like a subscription that can be easily cancelled after each month (see also my General Terms and Conditions).

Please go to [my Booking page](#) *at the latest* on the 1st of each month to purchase your "Balance And Stabilise Your Healing Process" Package of 2 Healing Sessions.

After your purchase, you will receive a Code in your confirmation email. With this Code you then have to schedule each Session separately (the Code will set the Session fee to 0 because you already paid for them). Just click on the link "Schedule" in your email, and the Code will already be entered.

Thank you for your trust in my healing work and in me. I look forward to supporting your healing and your transformation!
